PHYSICIAN ASSISTANT, DSC.P.A.

- Emergency Medicine, DSc.P.A. (https://catalog.baylor.edu/graduate-school/affiliated-programs/physician-assistant/emergency-medicine-dscpa/)
- Clinical Orthopedics, DSc.P.A. (https://catalog.baylor.edu/graduate-school/affiliated-programs/physician-assistant/orthopaedics-dscpa/)

Clinical Orthopaedics (MCO)

MCO 6140 Articular Injuries of the Knee (1)
This course summarizes the current diagnosis, treatment (conservative and surgical) and expected outcomes of articular cartilaginous injuries of the knee. This course will provide the DScPAS-CO resident the knowledge needed to diagnose and guide a patient through the various current treatment options.

MCO 6141 Anterior Knee Pain and Patello-femoral Joint Instability (1)
This course summarizes the possible causes, clinical presentations, and treatment options for anterior knee pain. This will provide the DScPAS-CO resident with the knowledge needed to properly diagnose and treat this common, yet significant problem.

MCO 6142 Genetics I and II, Developmental Dysplasia of the Hip (DDH), Legg-Calve-Perthes Disease and Slipped (1)
This course provides the basic knowledge and skills that the DScPAS-CO resident will require throughout training and in clinic practice regarding genetic disorders and musculoskeletal conditions.

MCO 6143 Orthopaedic Surgery in the Immunocompromised Host (1)
This course brings to light the special requirements and potential complications of orthopaedic surgery in the immunocompromised patient. Being familiar with techniques used to decrease morbidity and mortality in this special subset of the population undergoing orthopaedic surgery is essential for the DScPAS-CO resident in today’s society.

MCO 6144 Osteoarthritis (1)
This course is an overview of osteoarthritis, including the epidemiology, pathogenesis, clinical features, evaluation, and management. Clinically, osteoarthritis is a very common diagnosis, and being knowledgeable about this disease entity is essential for the DScPAS-CO resident.

MCO 6145 Benign Bone Tumors (1)
This course addresses the incidence, clinical and radiographic features, and management of benign bone tumors. Benign bone tumors are four to five times more common than malignant bone tumors, making familiarity with benign bone tumors essential for the DScPAS-CO resident.

MCO 6146 Prioritization and Management of the Polytrauma Patient (1)
This course discusses the prioritization and management of the polytrauma patient. The DScPAS-CO resident will become familiar with and utilize established trauma management protocols and learn how to integrate into a coordinated team of traumatologists.

MCO 6147 Ligamentous Injuries of the Foot and Ankle (1)
This course discusses common injuries of the foot and ankle. The DScPAS-CO resident will become familiar with and be able to differentiate surgical versus non-surgical ankle injuries and use well-established treatment options for non-surgical injuries.

MCO 6148 Knee Ligament and Meniscal Injuries: Epidemiology, Mechanism, Diagnosis and Natural History (1)
This course will give the DScPAS-CO resident knowledge necessary to identify, diagnose and determine the appropriate management course for knee ligamentous and meniscal injuries.

MCO 6150 Diagnosis and Management of Musculoskeletal Infection (1)
This course reviews the microbiology, history, physical exam findings, ancillary studies and management options for common musculoskeletal infections.

MCO 6151 Overview of Arthritis (1)
This course is an overview of arthritis. It touches on the impact of arthritis in our society and reviews some unique considerations in the care of the orthopaedic patient with arthritis.

MCO 6152 Pathophysiology of Bone Tumors (1)
This course is an overview of the pathophysiology of bone tumors. Understanding the pathophysiology of bone tumors will help the DScPAS-CO resident when evaluating a patient with an osseous lesion with regards to the expected natural course and the presenting symptoms.

MCO 6153 Orthopaedic Sports Medicine (1)
This course provides the basic knowledge and skills that the DScPAS-CO resident will require throughout training and in clinic practice regarding orthopaedic sports medicine.

MCO 6154 Spinal Pain (1)
This course covers the role of the spine in pathologic pain processes. Spinal pain is frequently non-specific and provides little insight into its source. The spine may be affected by a myriad of pathological disorders—traumatic, neoplastic, inflammatory, metabolic, or degenerative.

MCO 6201 Biomechanics of Fracture Fixation and Classification of Fractures (2)
This course will provide the DScPAS-CO resident with a basic introduction to the classification of fractures as well as the biomechanics of fractures, the biomechanics of implants used to fix fractures, and problems associated with implants and specific fracture patterns.

MCO 6202 The Multiply Injured Patient with Musculoskeletal Injuries and Anesthetic Care of the Trauma Patient (2)
This course will provide the orthopaedic PA resident familiarity with trauma team organization and responsibilities, ATLS guidelines, anesthetic care, DVT prophylaxis and orthopaedic management of the multiply injured patient.

MCO 6203 Non-Operative Fracture Treatment (2)
This course will provide the DScPAS-CO resident familiarity with the history of the evolution of fracture treatment and the effect of today’s treatments on the natural skeletal repair process. The resident will also gain familiarity with identifying fractures of the upper and lower extremities, which are commonly treated non-operatively with and without manipulative reduction.

MCO 6204 Principles of Internal and External Fixation (2)
This course discusses the principles of internal and external fixation. Being familiar with the principles of internal and external fixation is essential for the DScPAS-CO resident while developing a treatment plan, assisting during operative procedures, and providing post-operative care and rehabilitation.

MCO 6205 Musculoskeletal Healing, Vascular Injuries and Compartment Syndromes (2)
This course provides the basic knowledge and skills that the orthopaedic PA resident will require throughout training and in clinic practice regarding bone and soft tissue healing, open fractures, vascular injuries, and compartment syndrome.
Fractures and non-unions need more in-depth treatment. Not until recently has it been determined that clavicle fractures are anything but routine and that some problematic types of clavicle fractures occur after high energy mechanisms, and have a significant (35% to 98%) amount of associated injuries. This course covers explosive devices such as mortars, bombs, land mines and improvised explosive devices causing multiple torso, abdominal and extremity trauma. Initial management should focus on saving life and limb but also wound debridement and functional limb salvage for long-term functional and prosthetic use and the classification of common causes of pathologic and periprosthetic fractures.

Complications of Injury to the Musculoskeletal System (2) This course will give the OPA resident knowledge about the incidence, pathophysiology, examination, diagnostic testing and imaging, classification, and management of select common complications of traumatic, nontraumatic, and surgical (iatrogenic) injury to the musculoskeletal system.

Fractures and Dislocations of the Hand and Wrist (2) This course will provide the orthopaedic PA resident with the information and knowledge needed to diagnose, describe, reduce, and recommend for surgical fixation one of the most common fractures in all age groups.

Fractures and Dislocations of the Elbow and Distal Humerus (2) This course provides the basic knowledge and skills that the orthopaedic PA resident will require throughout training and in clinic practice regarding elbow dislocations and fractures about the elbow and distal humerus.

Subluxations and Dislocations about the Glenohumeral, Acromioclavicular, and Sternoclavicular Joint (2) This course will give the DScPAS-CO resident knowledge about the general anatomy, biomechanical pathology, examination, diagnostic imaging, and classification of select subluxations and dislocations of the glenohumeral joint and surrounding musculoskeletal tissues of the shoulder girdle.

Fractures of the Shaft and Proximal Humerus (2) This course discusses the evaluation and treatment of humeral shaft and proximal humerus fractures. Being familiar with the history, physical exam, radiological findings and treatment of humerus fractures is an essential skill for the orthopaedic PA.

Fractures of the Clavicle and Scapula (2) This course covers scapular fractures which can occur after high energy mechanisms, and have a significant (35% to 98%) amount of associated injuries. Fractures of the scapula occur infrequently at 0.4% to 1% of all fractures. Not until recently has it been determined that clavicle fractures are anything but routine and that some problematic types of clavicle fractures and non-unions need more in-depth treatment.
MCO 6306 Orthopaedic Tumor Rotation (3)
This is a one-month clinical and surgical rotation on service with a fellowship-trained musculoskeletal oncologist and a team of surgical residents.

MCO 6308 Orthopaedic Emergencies and Inpatient Care (3)
Instructs students on appropriate care for orthopaedic emergencies while on call for the Emergency Department and while doing daily rounds on orthopaedic inpatients. Instruction also covers daily wound care for orthopaedic inpatients as well as preoperative and postoperative management.

MCO 6346 Clinical Research (3)
The MCO 6346 course consists of a didactic phase during the first month of training, dedicated research blocks, and individual research days scheduled throughout the eighteen-month course. The research course is designed to familiarize residents with the research process and, more importantly, to facilitate the development of the skills necessary to critically analyze published scientific articles, including statistical aspects of those articles.

MCO 6350 Introduction to Orthopaedic Clinical Evaluation and Procedures (3)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of orthopaedic patients, and focusing on extremity anatomy, biomechanical pathology, physical examination, diagnostic imaging, and rehabilitation methods.

MCO 6351 Evidence Based Orthopaedic Care (3)
This course introduces the application of evidence-based medicine to the management of orthopaedic complaints, focusing on assessing current peer-reviewed journal articles for sound research design and valid conclusions so as to apply lessons learned from the literature to individual patients and patient populations.

MCO 6352 Orthopaedic Evaluation and Management of Spine Disorders (3)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of orthopaedic spine complaints, and focusing on spine anatomy, biomechanical pathology, physical examination, diagnostic imaging, and classification of common select fractures of the spine.

MCO 6353 Evaluation and Management of Neurologic Disorders (3)
This course introduces advanced principles of orthopaedic evaluation, diagnosis and treatment necessary for regular clinical application, applying evidence-based medicine to the management of neurologic complaints, and focusing on spine and head anatomy, biomechanical pathology, physical examination, diagnostic imaging, laboratory studies, and classification of common select fractures of the head and spine.

MCO 6354 Evaluation and Management of Pediatric Orthopaedic Disorders (3)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of pediatric orthopaedic complaints, and focusing on general anatomy, biomechanical pathology, physical examination, diagnostic imaging, laboratory studies, congenital disorders, and classification of pediatric fractures.

MCO 6355 Advanced Orthopaedic Clinical Evaluation and Procedures (3)
This course furthers critical principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of orthopaedic patients, and focusing on extremity anatomy, biomechanical pathology, physical examination, diagnostic imaging, and rehabilitation methods.

MCO 6356 Techniques for Medical Research Presentation (3)
Pre-requisite(s): CITI training only
This course introduces various techniques for medical research presentation. It takes information obtained in developing a high-quality clinical research project, demographic and outcome measure data, and statistical analysis, and generates oral and written products for presentation at local and national venues.

MCO 6401 Orthopaedic Sports Rotation (4)
This is a two-month clinical and surgical rotation on service with an orthopaedic sports medicine surgeon and a team of surgical residents.

MCO 6402 Orthopaedic Trauma Rotation (4)
This is a two-month clinical and surgical rotation on service with a fellowship-trained orthopaedic traumatologist and a team of surgical residents.

MCO 6410 Introduction to Upper Extremity Sports Injury Management (4)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of patient athletes, and focusing on upper extremity anatomy, biomechanical pathology, physical examination, diagnostic imaging, and rehabilitation methods.

MCO 6411 Introduction to Lower Extremity Sports Injury Management (4)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of patient athletes, and focusing on lower extremity anatomy, biomechanical pathology, physical examination, diagnostic imaging, and rehabilitation methods.

MCO 6412 Evaluation and Management of Hand and Elbow Disorders (4)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application; applies evidence-based medicine to the management of orthopaedic upper extremity complaints; and focuses on microsurgery, upper extremity anatomy, biomechanical pathology, physical examination, diagnostic imaging, and classification of common select fractures and dislocations of the upper extremity.

MCO 6413 Evaluation and Management of Foot and Ankle Disorders (4)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of orthopaedic complaints, and focusing on lower extremity anatomy, biomechanical pathology, physical examination, diagnostic imaging, and classification of common select fractures and dislocations of the leg, ankle, and foot.
MCO 6414 Evaluation and Management of Complex Wounds (4)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of patients with complex wounds, and focusing on general anatomy, biomechanical pathology, physical examination, diagnostic imaging, laboratory studies, and medical and surgical management of complex wounds.

MCO 6415 Evaluation of Joint Arthritis and Trauma Managed with Joint Reconstruction (4)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of orthopaedic complaints, and focusing on general anatomy, biomechanical pathology, physical examination, diagnostic imaging, classification of periarticular fractures, and arthritis.

MCO 6416 Musculoskeletal Oncology Evaluation and Management (4)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of musculoskeletal neoplasms and infections, and focusing on general anatomy, biomechanical pathology, physical examination, diagnostic imaging, laboratory studies, and radiographic classification of oncologic lesions and pathologic fractures.

MCO 6417 Introduction to Evaluation and Management of Orthopaedic Trauma (4)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of musculoskeletal trauma, and focusing on general anatomy, biomechanical pathology, physical examination, diagnostic imaging, laboratory studies, and radiographic classification of orthopaedic trauma.

MCO 6418 Introduction to Evaluation and Management of General Trauma (4)
This course introduces advanced principles of surgical evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of multisystem trauma, and focusing on general anatomy, biomechanical pathology, physical examination, diagnostic imaging, laboratory studies, and radiographic classification of multisystem trauma.

MCO 6419 Introduction to Critical Care Management (4)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of intensive care unit patients, and focusing on general anatomy, biomechanical pathology, physical examination, diagnostic imaging, laboratory studies, and medical management of critical patients.

MCO 6420 Advanced Sports Injury Management (4)
This course further examines critical principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of patient athletes, and focusing on extremity anatomy, biomechanical pathology, physical examination, diagnostic imaging, and rehabilitation methods.

MCO 6421 Advanced evaluation and management of orthopaedic trauma (4)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of musculoskeletal trauma, and focusing on general anatomy, biomechanical pathology, physical examination, diagnostic imaging, laboratory studies, and radiographic classification of orthopaedic trauma.

MCO 6422 Advanced Critical Care Management (4)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of intensive care unit patients, and focusing on general anatomy, biomechanical pathology, physical examination, diagnostic imaging, laboratory studies, and medical management of critical patients.

MCO 6423 Medical Research Design (4)
Pre-requisite(s): CITI training only
This course introduces approaches to medical data collection and analysis, focusing on executing a research protocol, collecting outcome measures data, and then participating in the analysis of the data.

MCO 6424 Approaches to Medical Data Collection and Analysis (4)
Pre-requisite(s): CITI training only
This course introduces approaches to medical data collection and analysis, focusing on executing a research protocol, collecting outcome measures data, and then participating in the analysis of the data.

MCO 6425 Urgent Orthopaedic Evaluation (4)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of musculoskeletal trauma, and focusing on extremity anatomy, biomechanical pathology, physical examination, diagnostic imaging, laboratory studies, and radiographic classification of orthopaedic trauma.

MCO 6426 Advanced Joint Reconstruction (4)
Pre-requisite(s): MCO 6417
This course advances principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application. It applies evidence-based medicine to the management of orthopaedic complaints. The course focuses on general anatomy, biomechanical pathology, physical examination, diagnostic imaging, classification of periarticular fractures, and arthritis.

Emergency Medicine (MEM)
MEM 6142 Radiology (1)
Pre-requisite(s): MEM 6330
A rotation to orient the Emergency Medicine Physician Assistant Resident to the concepts of radiology in emergency medicine.

MEM 6143 Oral-Maxillary Facial Surgery (1)
Pre-requisite(s): MEM 6330
A rotation emphasizing the management of head and neck disorders. Practicum and didactics in the disorders of the head and neck.

MEM 6144 Toxicology (1)
Pre-requisite(s): MEM 6330
A rotation emphasizing toxicological presentations encountered in the emergency department.
MEM 6210 Introduction to Emergency Medicine Resuscitation, Shock, and Anesthesia (2)
Pre-requisite(s): MEM 6330
This course studies the clinical side of resuscitation techniques, shock recognition and treatment, and anesthesia used in the emergency department.

MEM 6211 Emergency Treatment of Orthopedic Injuries, Emergency Ultrasounds, and Emergency Radiology (2)
Pre-requisite(s): MEM 6330
Study of concepts of orthopedic conditions encountered in the emergency department.

MEM 6212 Toxicology and Oral Maxillary Facial Disorders (2)
Pre-requisite(s): MEM 6330
This rotation studies concepts of toxicological presentations and oral maxillary facial disorders encountered in the emergency department.

MEM 6213 Cardiovascular, Pulmonary, Hematologic, Oncologic, and Psychosocial Diseases and Disorders (2)
Pre-requisite(s): MEM 6330
The study of concepts of cardiovascular, pulmonary, hematologic, oncologic, and psychosocial diseases encountered in an emergency department environment.

MEM 6214 Gastrointestinal, Genitourinary, Obstetrics, and Gynecology Diseases (2)
Pre-requisite(s): MEM 6330
The study of concepts in gastrointestinal, genitourinary, obstetrics, and gynecology diseases encountered in an emergency department environment.

MEM 6215 Pediatric Non-Traumatic Musculoskeletal Disorders, Abuse, and Assault (2)
Pre-requisite(s): MEM 6330
The study of diseases, non-traumatic muscular skeletal disorders, assault and abuse in the pediatric emergency department patient.

MEM 6216 Emergency Wound Management, Environmental Injuries, and Trauma (2)
Pre-requisite(s): MEM 6330
The study of concepts in wound management, environmental injuries, and trauma encountered in the emergency department.

MEM 6217 Infectious Disease, Endocrinology, and Neurology (2)
Pre-requisite(s): MEM 6330
The study of concept in infectious diseases and endocrinologic, and neurologic disorders that are encountered in an emergency department.

MEM 6220 Advanced Emergency Medicine, Resuscitation, Shock, and Anesthesia (2)
Pre-requisite(s): MEM 6210
This course builds upon MEM 6210 and studies the clinical side of resuscitation techniques, shock recognition and treatment, and anesthesia used in the emergency department.

MEM 6221 Advanced Emergency Treatment of Orthopedic Injuries, Emergency Ultrasounds, and Emergency Radiology (2)
Pre-requisite(s): MEM 6211
Study of advanced concepts of orthopedic conditions encountered in the emergency department.

MEM 6222 Advanced Toxicology and Oral Maxillary Facial Disorders (2)
Pre-requisite(s): MEM 6212
This rotation studies advanced concepts of toxicological presentations and oral maxillary facial disorders encountered in the emergency department.

MEM 6223 Advanced Cardiovascular, Pulmonary, Hematologic, Oncologic, and Psychosocial Disorders (2)
Pre-requisite(s): MEM 6213
The study of advanced concepts of cardiovascular, pulmonary, hematologic, oncologic, and psychosocial diseases encountered in an emergency department environment.

MEM 6224 Advanced Gastrointestinal, Genitourinary Obstetrics, and Gynecology Diseases (2)
Pre-requisite(s): MEM 6214
The study of advanced concepts in gastrointestinal, genitourinary, obstetrics, and gynecology diseases encountered in an emergency department environment.

MEM 6225 Advanced Pediatrics Non-Traumatic Musculoskeletal Disorders, Abuse, and Assault (2)
Pre-requisite(s): MEM 6215
The advanced study of diseases, non-traumatic muscular skeletal disorders, assault, and abuse in the pediatric emergency department patient.

MEM 6226 Advanced Emergency Wound Management, Environmental Injuries, and Trauma (2)
Pre-requisite(s): MEM 6216
The study of advanced concepts in wound management, environmental injuries, and trauma encountered in the emergency department.

MEM 6227 Advanced Infectious Disease, Endocrinology, and Neurology (2)
Pre-requisite(s): MEM 6217
The study of advanced concepts in infectious diseases, endocrinologic, and neurologic disorders that are encountered in an emergency department.

MEM 6231 Emergency Department 1 (2)
Pre-requisite(s): MEM 6330
General emergency medicine rotation to apply the concepts of medical practice in an emergency department setting.

MEM 6232 Emergency Department 2 (2)
Pre-requisite(s): MEM 6330
General emergency medicine rotation to apply the concepts of medical practice in an emergency department setting.

MEM 6233 Emergency Department 3 (2)
Pre-requisite(s): MEM 6330
General emergency medicine rotation to apply the concepts of medical practice in an emergency department setting.

MEM 6234 Emergency Department 4 (2)
Pre-requisite(s): MEM 6330
General emergency medicine rotation to apply the concepts of medical practice in an emergency department setting.

MEM 6235 Emergency Department 5 (2)
Pre-requisite(s): MEM 6330
General emergency medicine rotation to apply the concepts of medical practice in an emergency department setting.

MEM 6330 Orientation to Emergency Medicine (3)
A comprehensive orientation to the field of Emergency Medicine, with formal presentations/lectures, ACLS/PALS, Emergency Department administrative issues, Emergency Medical Services, ethics and professionalism, and an introduction to research in emergency medicine.
MEM 6336 Emergency Department 6 (3)
Pre-requisite(s): MEM 6330
General emergency medicine rotation to apply the concepts of medical practice in an emergency department setting.

MEM 6337 Emergency Department 7 (3)
Pre-requisite(s): MEM 6330
General emergency medicine rotation to apply the concepts of medical practice in an Emergency Department setting.

MEM 6338 Emergency Department 8 (3)
Pre-requisite(s): MEM 6330
General emergency medicine rotation to apply the concepts of medical practice in an emergency department setting.

MEM 6346 Clinical Research (3)
Pre-requisite(s): MEM 6330
The MEM 6346 rotation consists of a didactic phase during the first month of training, dedicated research blocks, and individual research days scheduled throughout the 18-month course. The research course is designed to familiarize the residents with the research process and, more importantly, to facilitate the development of the skills necessary to critically analyze published scientific articles.

MEM 6439 Pediatrics Emergency Department (4)
Pre-requisite(s): MEM 6330
A rotation emphasizing the clinical side of pediatric patients in the emergency department.

MEM 6440 Pediatrics Emergency Department and Pediatric Intensive Care Unit (4)
Pre-requisite(s): MEM 6330
A rotation emphasizing the clinical side of pediatric patients in the Emergency Department and Pediatric ICU.

MEM 6445 Emergency Ultrasound (4)
Emergency ultrasound is the medical use of ultrasound technology for the bedside diagnostic evaluation of emergency medical conditions; resuscitation of the acutely ill, critically ill or injured; and guidance of high risk or difficult procedures. Typically, emergency ultrasound is a goal-directed, focused ultrasound examination that answers brief and important clinical questions in an organ system or involving multiple organ systems.

MEM 6447 Surgical Intensive Care Unit (SICU) (4)
Pre-requisite(s): MEM 6330
A rotation emphasizing the concepts and management of trauma and post-operative patients encountered in the Emergency Department.

MEM 6448 Medical Intensive Care Unit (MICU) (4)
Pre-requisite(s): MEM 6330
A rotation emphasizing life threatening diseases encountered in the emergency department and managed in the MICU.

MEM 6449 Cardiac Care Unit (CCU) (4)
Pre-requisite(s): MEM 6330
A rotation emphasizing the concepts of cardiovascular diseases encountered in the emergency department and managed in the CCU.

MEM 6450 Trauma Surgery (4)
Pre-requisite(s): MEM 6330
A rotation emphasizing the concepts of trauma management and lifesaving surgery.

Military General Surgery (MCG)

MGS 6210 Surgical Basic Principles (2)
Historical surgical perspective on basic cellular, physiological principles of surgery.

MGS 6211 Perioperative Management (2)
Basis of surgery is evaluation of the risk factors of a potential surgical patient. Perioperative management focus on the risk, benefits, and infections of surgery and the complications of anesthesia.

MGS 6212 The Abdomen (2)
The anatomy and physiological process that occur within the abdomen (abdominal wall, umbilicus, peritoneum, mesenteries, omentum, retroperitoneum, hernia, acute abdomen, and acute gastrointestinal hemorrhage).

MGS 6213 Surgery of the Esophagus and Stomach (2)
Anatomy, physiology, disease process, and surgical treatments of the stomach and esophagus, along with hiatal hernia and gastroesophageal reflux disease.

MGS 6214 Surgery of the Small Intestine, Large Intestine, Rectum, and Anus (2)
Surgical anatomy, pathophysiology, disease process, and treatment of the small intestine, large intestine, rectum, and anus.

MGS 6215 Surgery of the Liver and Biliary Tract (2)
Anatomy, pathophysiology, disease process, and treatments of liver and biliary tract.

MGS 6216 Surgery of the Pancreas and Spleen (2)
Anatomy, pathophysiology, disease process, and treatments of the pancreas and spleen.

MGS 6217 Endocrine Surgery (2)
Anatomy, pathophysiology, disease process, and treatment of thyroid, parathyroid, adrenal glands, and endocrine of the pancreas.

MGS 6218 Breast Surgery (2)
Anatomy, pathophysiology, disease process, and treatment of the breast.

MGS 6219 Neurosurgery, Pediatric Surgery (2)
Anatomy, pathophysiology, disease process, and treatments in neurosurgery and pediatric surgery.

MGS 6220 Burn/Critical Care Surgery (2)
Anatomy, pathophysiology, disease process, and treatments associated with burn surgery.

MGS 6221 Trauma Surgery (2)
Anatomy, pathophysiology, disease process, and treatment related to trauma surgery.

MGS 6222 Surgical Critical Care (2)
Anatomy, pathophysiology, disease process, and treatments related to surgical critical care.

MGS 6223 Surgery on the Lung, Chest Wall, and Mediastinum (2)
Anatomy, pathophysiology, disease process, and treatments related to the lung, chest wall, and mediastinum.

MGS 6224 Surgical Oncology (2)
Anatomy, pathophysiology, disease process, and treatment of surgical oncology.

MGS 6225 Vascular Surgery (2)
Anatomy, pathophysiology, disease process, and treatment in vascular surgery.
MGS 6330  Orientation to General Surgery (3)
This rotation emphasizes the clinical skills of providing care and treatment to patients with surgical disease.

MGS 6331  General Surgery Team A (Colorectal, General Surgery, Pediatric) (3)
Rotation is a block emphasizing colorectal and pediatric surgery cases presenting to the General Surgery Department.

MGS 6332  General Surgery Team B (Minimally Invasive Surgery) (3)
This is a clinical block of instruction emphasizing minimally invasive surgery for general surgery and bariatric cases.

MGS 6333  General Surgery Team C (General Surgery) (3)
This rotation is a block emphasizing minimally invasive and bariatric cases presenting to the General Surgery Department.

MGS 6334  General Surgery (WH) (3)
This rotation is a block emphasizing general surgery cases presenting to the General Surgery Department.

MGS 6335  General Surgery Team D (Surgical Oncology) (3)
This rotation is a block emphasizing surgical oncology cases presenting to the General Surgery Department.

MGS 6336  Interventional Radiology (3)
This rotation is a block emphasizing interventional radiology cases presenting to the Interventional Radiology Department.

MGS 6337  Trauma Surgery (Rotation 1) (3)
This rotation is a block emphasizing trauma surgery cases presenting to the Trauma Surgery Department.

MGS 6338  Vascular Surgery (3)
This rotation is a block emphasizing vascular surgery cases presenting to the Vascular Surgery Department.

MGS 6339  Burn Surgery/Burn Critical Care (Rotation 2) (3)
This rotation is a block emphasizing burn surgery/burn critical care cases presenting to the Burn Surgery Department.

MGS 6340  Plastic Surgery (3)
This rotation is a block emphasizing plastic surgery cases presenting to the Plastic Surgery Department.

MGS 6341  Neurosurgery (3)
This rotation is a block emphasizing neurosurgical cases presenting to Neurosurgery Department.

MGS 6342  Trauma Surgery (Rotation 2) (3)
This rotation is a block emphasizing trauma surgery cases presenting to the Trauma Surgery Department.

MGS 6343  Trauma/Surgical Intensive Care Unit (Rotation 1) (3)
This rotation is a block emphasizing trauma/surgery intensive care unit (STICU) cases presenting to the Trauma Surgery Department.

MGS 6344  Trauma/Surgical Intensive Care Unit (STICU) (Rotation 2) (3)
This rotation is a clinical block emphasizing trauma/surgical intensive care unit (STICU) cases that present to the Trauma Surgery Department.

MGS 6345  Burn Surgery/Burn Critical Care (Rotation 1) (3)
This rotation is a clinical block emphasizing burn surgery/burn critical care cases presenting to the Burn Surgery Department.

MGS 6346  Elective Concentration (3)
This rotation is a block emphasizing an elective concentration rotation for the resident.

MGS 6347  Clinical Research (3)
In this course, students develop the knowledge to plan, organize, conduct, and submit for publication an approved Investigative Review Board (IRB) research project.

MGS 6348  Neurosurgery (Rotation 2) (3)

MGS 6349  Orthopaedic Trauma (Rotation 1) (3)
Clinical Rotation evaluating orthopaedic trauma and performing orthopaedic trauma procedures, interventions, and treatments.

MGS 6350  Orthopaedic Trauma (Rotation 2) (3)
Clinical rotation evaluating orthopaedic trauma and performing orthopaedic trauma procedures, interventions, and treatments.
