PHYSICIAN ASSISTANT, DSc.P.A.

- Emergency Medicine, DSc.P.A. (https://catalog.baylor.edu/graduate-school/affiliated-programs/physician-assistant/emergency-medicine-dsca/)

Clinical Orthopaedics (MCO)

MCO 6140 Articular Injuries of the Knee (1)
This course summarizes the current diagnosis, treatment (conservative and surgical) and expected outcomes of articular cartilaginous injuries of the knee. This course will provide the DScPAS-CO resident the knowledge needed to diagnose and guide a patient through the various current treatment options.

MCO 6141 Anterior Knee Pain and Patello-femoral Joint Instability (1)
This course summarizes the possible causes, clinical presentations, and treatment options for anterior knee pain. This will provide the DScPAS-CO resident with the knowledge needed to properly diagnose and treat this common, yet significant problem.

MCO 6142 Genetics I and II, Developmental Dysplasia of the Hip (DDH), Legg-Calve-Perthes Disease and Slipped (1)
This course provides the basic knowledge and skills that the DScPAS-CO resident will require throughout training and in clinic practice regarding genetic disorders and musculoskeletal conditions.

MCO 6143 Orthopaedic Surgery in the Immunocompromised Host (1)
This course brings to light the special requirements and potential complications of orthopaedic surgery in the immunocompromised patient. Being familiar with techniques used to decrease morbidity and mortality in this special subset of the population undergoing orthopaedic surgery is essential for the DScPAS-CO resident in today’s society.

MCO 6144 Osteoarthritis (1)
This course is an overview of osteoarthritis, including the epidemiology, pathogenesis, clinical features, evaluation, and management. Clinically, osteoarthritis is a very common diagnosis, and being knowledgeable about this disease entity is essential for the DScPAS-CO resident.

MCO 6145 Benign Bone Tumors (1)
This course addresses the incidence, clinical and radiographic features, and management of benign bone tumors. Benign bone tumors are four to five times more common than malignant bone tumors, making familiarity with benign bone tumors essential for the DScPAS-CO resident.

MCO 6146 Prioritization and Management of the Polytrauma Patient (1)
This course discusses the prioritization and management of the polytrauma patient. The DScPAS-CO resident will become familiar with and utilize established trauma management protocols and learn how to integrate into a coordinated team of traumatologists.

MCO 6147 Ligamentous Injuries of the Foot and Ankle (1)
This course discusses common injuries of the foot and ankle. The DScPAS-CO resident will become familiar with and be able to differentiate surgical versus non-surgical ankle injuries and use well-established treatment options for non-surgical injuries.
MCO 6206 Penetrating Trauma/Bone and Soft Tissue Reconstruction (2)
This course focuses on penetrating trauma caused by ballistic projectiles. Emphasis is on ballistic behavior and the resulting orthopaedic injuries. Initial management principles are explained with differentiation between the management of upper and lower extremity injuries.

MCO 6207 War Wounds, Limb Salvage Traumatic Amputations, and Periprosthetic Fractures (2)
This course covers explosive devices such as mortars, bombs, land mines and improvised explosive devices causing multiple torso, abdominal and extremity trauma. Initial management should focus on saving life and limb but also wound debridement and functional limb salvage for long-term functional and prosthetic use and the classification of common causes of pathologic and periprosthetic fractures.

MCO 6208 Complications of Injury to the Musculoskeletal System (2)
This course will give the OPA resident knowledge about the incidence, pathophysiology, examination, diagnostic testing and imaging, classification, and management of select common complications of traumatic, nontraumatic, and surgical (iatrogenic) injury to the musculoskeletal system.

MCO 6209 Fractures and Dislocations of the Hand and Wrist (2)
This course will provide the DScPAS-CO resident with a base knowledge of fractures and dislocations in the hand and wrist with insight into the complexities involved with even the seemingly insignificant appearing fractures.

MCO 6210 Fractures of the Radial and Ulnar Shafts and Isolated Distal Radius Fractures (2)
This course will provide the orthopaedic PA resident with the information and knowledge needed to diagnose, describe, reduce, and recommend for surgical fixation one of the most common fractures in all age groups.

MCO 6211 Fractures and Dislocations of the Elbow and Distal Humerus (2)
This course provides the basic knowledge and skills that the orthopaedic PA resident will require throughout training and in clinic practice regarding elbow dislocations and fractures about the elbow and distal humerus.

MCO 6212 Subluxations and Dislocations about the Glenohumeral, Acromioclavicular, and Sternoclavicular Joint (2)
This course will give the DScPAS-CO resident knowledge about the general anatomy, biomechanical pathology, examination, diagnostic imaging, and classification of select subluxations and dislocations of the glenohumeral joint and surrounding musculoskeletal tissues of the shoulder girdle.

MCO 6213 Fractures of the Shaft and Proximal Humerus (2)
This course discusses the evaluation and treatment of humeral shaft and proximal humerus fractures. Being familiar with the history, physical exam, radiological findings and treatment of humerus fractures is an essential skill for the orthopaedic PA.

MCO 6214 Fractures of the Clavicle and Scapula (2)
This course covers scapular fractures which can occur after high energy mechanisms, and have a significant (35% to 98%) amount of associated injuries. Fractures of the scapula occur infrequently at 0.4% to 1% of all fractures. Not until recently has it been determined that clavicle fractures are anything but routine and that some problematic types of clavicle fractures and non-unions need more in-depth treatment.

MCO 6215 Fractures of the Pelvic Ring and Acetabulum (2)
This course will provide the DScPAS-CO resident with the basic information necessary to diagnose, describe, reduce, and treat fractures of the pelvis and acetabulum.

MCO 6216 Femoral Head, Neck, and Intertrochanteric Fractures and Hip Dislocations (2)
This course will give the DScPAS-CO resident knowledge of the general anatomy, biomechanical pathology, signs and symptoms, examination, diagnostic imaging, and classification of hip dislocations and fractures of the head, neck and intertrochanteric regions of the femur.

MCO 6217 Subtrochanteric Fractures and Fractures of the Shaft of the Femur (2)
This course will give the DScPAS-CO resident knowledge about the general anatomy, biomechanical pathology, signs and symptoms, examination, diagnostic imaging, and classification of subtrochanteric and femoral shaft fractures.

MCO 6218 Fractures of the Proximal Tibia, Fibula and Patella (2)
This course will give the DScPAS-CO resident knowledge about the general anatomy, biomechanical pathology, signs and symptoms, examination, diagnostic imaging, and classification of select common fractures of the proximal tibia, fibula and the patella.

MCO 6219 Knee Injuries and Fractures of the Tibia and Fibula Shafts (2)
This course will give the OPA resident knowledge about the general anatomy, biomechanical pathology, examination, diagnostic imaging, and classification of select common injuries of the knee as well as examination, diagnostic imaging, and classification of select common fractures of the tibia and fibula.

MCO 6220 Ankle Fractures and Fractures of the Talus (2)
This course will give the OPA resident knowledge about the general anatomy, biomechanical pathology, examination, diagnostic imaging, and classification of common select fractures and dislocations of the ankle and talus.

MCO 6221 Fractures and Dislocations of the Midfoot, Forefoot, and Calcaneous (2)
This course will give the OPA resident knowledge about the general anatomy, biomechanical pathology, examination, diagnostic imaging, and classification of common select fractures and dislocations of the calcaneous, midfoot, and forefoot.

MCO 6230 Foot and Ankle Practical Rotation (3)
This is a one-month clinical and surgical rotation on service with a fellowship-trained foot and ankle surgeon and a team of surgical residents.

MCO 6231 Orthopaedic Spine Rotation (3)
This is a one-month clinical and surgical rotation on service with a fellowship-trained orthopaedic spine surgeon and a team of surgical residents.

MCO 6232 Pediatric Orthopaedic Surgery Rotation (3)
This is a one-month clinical and surgical rotation on service with a fellowship-trained pediatric orthopaedic surgeon and a team of surgical residents.

MCO 6233 Orthopaedic Total Joint Rotation (3)
This is a one-month clinical and surgical rotation on service with a fellowship-trained total joint surgeon and a team of surgical residents.

MCO 6234 Orthopaedic Hand Surgery Rotation (3)
This is a one-month clinical and surgical rotation on service with a fellowship-trained hand surgeon and a team of surgical residents.
MCO 6306 Orthopaedic Tumor Rotation (3)
This is a one-month clinical and surgical rotation on service with a fellowship-trained musculoskeletal oncologist and a team of surgical residents.

MCO 6308 Orthopaedic Emergencies and Inpatient Care (3)
Instructs students on appropriate care for orthopaedic emergencies while on call for the Emergency Department and while doing daily rounds on orthopaedic inpatients. Instruction also covers daily wound care for orthopaedic inpatients as well as preoperative and postoperative management.

MCO 6346 Clinical Research (3)
The MCO 6346 course consists of a didactic phase during the first month of training, dedicated research blocks, and individual research days scheduled throughout the eighteen-month course. The research course is designed to familiarize residents with the research process and, more importantly, to facilitate the development of the skills necessary to critically analyze published scientific articles, including statistical aspects of those articles.

MCO 6350 Introduction to Orthopaedic Clinical Evaluation and Procedures (3)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of orthopaedic patients, and focusing on extremity anatomy, biomechanical pathology, physical examination, diagnostic imaging, and rehabilitation methods.

MCO 6351 Evidence Based Orthopaedic Care (3)
This course introduces the application of evidence-based medicine to the management of orthopaedic complaints, focusing on assessing current peer-reviewed journal articles for sound research design and valid conclusions so as to apply lessons learned from the literature to individual patients and patient populations.

MCO 6352 Orthopaedic Evaluation and Management of Spine Disorders (3)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of orthopaedic spine complaints, and focusing on spine anatomy, biomechanical pathology, physical examination, diagnostic imaging, and classification of common select fractures of the spine.

MCO 6353 Evaluation and Management of Neurologic Disorders (3)
This course introduces advanced principles of orthopaedic evaluation, diagnosis and treatment necessary for regular clinical application, applying evidence-based medicine to the management of neurologic complaints, and focusing on spine and head anatomy, biomechanical pathology, physical examination, diagnostic imaging, laboratory studies, and classification of common select fractures of the head and spine.

MCO 6354 Evaluation and Management of Pediatric Orthopaedic Disorders (3)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of pediatric orthopaedic complaints, and focusing on general anatomy, biomechanical pathology, physical examination, diagnostic imaging, laboratory studies, congenital disorders, and classification of pediatric fractures.

MCO 6355 Advanced Orthopaedic Clinical Evaluation and Procedures (3)
This course furthers critical principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of orthopaedic patients, and focusing on extremity anatomy, biomechanical pathology, physical examination, diagnostic imaging, and rehabilitation methods.

MCO 6356 Techniques for Medical Research Presentation (3)
Pre-requisite(s): CITI training only
This course introduces various techniques for medical research presentation. It takes information obtained in developing a high-quality clinical research project, demographic and outcome measure data, and statistical analysis, and generates oral and written products for presentation at local and national venues.

MCO 6401 Orthopaedic Sports Rotation (4)
This is a two-month clinical and surgical rotation on service with an orthopaedic sports medicine surgeon and a team of surgical residents.

MCO 6402 Orthopaedic Trauma Rotation (4)
This is a two-month clinical and surgical rotation on service with a fellowship-trained orthopaedic traumatologist and a team of surgical residents.

MCO 6410 Introduction to Upper Extremity Sports Injury Management (4)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of patient athletes, and focusing on upper extremity anatomy, biomechanical pathology, physical examination, diagnostic imaging, and rehabilitation methods.

MCO 6411 Introduction to Lower Extremity Sports Injury Management (4)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of patient athletes, and focusing on lower extremity anatomy, biomechanical pathology, physical examination, diagnostic imaging, and rehabilitation methods.

MCO 6412 Evaluation and Management of Hand and Elbow Disorders (4)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application; applies evidence-based medicine to the management of orthopaedic upper extremity complaints; and focuses on microsurgery, upper extremity anatomy, biomechanical pathology, physical examination, diagnostic imaging, and classification of common select fractures and dislocations of the upper extremity.

MCO 6413 Evaluation and Management of Foot and Ankle Disorders (4)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of orthopaedic complaints, and focusing on lower extremity anatomy, biomechanical pathology, physical examination, diagnostic imaging, and classification of common select fractures and dislocations of the leg, ankle, and foot.
MCO 6414 Evaluation and Management of Complex Wounds (4)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of patients with complex wounds, and focusing on general anatomy, biochemistry, physical examination, diagnostic imaging, laboratory studies, and medical and surgical management of complex wounds.

MCO 6415 Evaluation of Joint Arthritis and Trauma Managed with Joint Reconstruction (4)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of orthopaedic complaints, and focusing on general anatomy, biomechanical pathology, physical examination, diagnostic imaging, classification of periarticular fractures, and arthritis.

MCO 6416 Musculoskeletal Oncology Evaluation and Management (4)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of musculoskeletal neoplasms and infections, and focusing on general anatomy, biomechanical pathology, physical examination, diagnostic imaging, laboratory studies, and radiographic classification of oncologic lesions and pathologic fractures.

MCO 6417 Introduction to Evaluation and Management of Orthopaedic Trauma (4)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of musculoskeletal trauma, and focusing on general anatomy, biomechanical pathology, physical examination, diagnostic imaging, laboratory studies, and radiographic classification of orthopaedic trauma.

MCO 6418 Introduction to Evaluation and Management of General Trauma (4)
This course introduces advanced principles of surgical evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of multisystem trauma, and focusing on general anatomy, biomechanical pathology, physical examination, diagnostic imaging, laboratory studies, and radiographic classification of multisystem trauma.

MCO 6419 Introduction to Critical Care Management (4)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of intensive care unit patients, and focusing on general anatomy, biomechanical pathology, physical examination, diagnostic imaging, laboratory studies, and medical management of critical patients.

MCO 6420 Advanced Sports Injury Management (4)
This course further examines critical principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of patient athletes, and focusing on extremity anatomy, biomechanical pathology, physical examination, diagnostic imaging, and rehabilitation methods.

MCO 6421 Advanced evaluation and management of orthopaedic trauma (4)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of musculoskeletal trauma, and focusing on general anatomy, biomechanical pathology, physical examination, diagnostic imaging, laboratory studies, and radiographic classification of orthopaedic trauma.

MCO 6422 Advanced Critical Care Management (4)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of intensive care unit patients, and focusing on general anatomy, biomechanical pathology, physical examination, diagnostic imaging, laboratory studies, and medical management of critical patients.

MCO 6423 Medical Research Design (4)
Pre-requisite(s): CITI training only
This course introduces medical research design, focusing on generating a testable research question, developing a research design that addresses the question, and conducting a literature review that supports the study design.

MCO 6424 Approaches to Medical Data Collection and Analysis (4)
Pre-requisite(s): CITI training only
This course introduces approaches to medical data collection and analysis, focusing on executing a research protocol, collecting outcome measures data, and then participating in the analysis of the data.

MCO 6425 Urgent Orthopaedic Evaluation (4)
This course introduces advanced principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application, applying evidence-based medicine to the management of musculoskeletal trauma, and focusing on extremity anatomy, biomechanical pathology, physical examination, diagnostic imaging, laboratory studies, and radiographic classification of orthopaedic trauma.

MCO 6426 Advanced Joint Reconstruction (4)
Pre-requisite(s): MCO 6417
This course advances principles of orthopaedic evaluation, diagnosis, and treatment necessary for regular clinical application. It applies evidence-based medicine to the management of orthopaedic complaints. The course focuses on general anatomy, biomechanical pathology, physical examination, diagnostic imaging, classification of periarticular fractures, and arthritis.

Emergency Medicine (MEM)
MEM 6142 Radiology (1)
Pre-requisite(s): MEM 6330
A rotation to orient the Emergency Medicine Physician Assistant Resident to the concepts of radiology in emergency medicine.

MEM 6143 Oral-Maxillary Facial Surgery (1)
Pre-requisite(s): MEM 6330
A rotation emphasizing the management of head and neck disorders. Practicum and didactics in the disorders of the head and neck.

MEM 6144 Toxicology (1)
Pre-requisite(s): MEM 6330
A rotation emphasizing toxicological presentations encountered in the emergency department.

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>MEM 6210</td>
<td>Introduction to Emergency Medicine Resuscitation, Shock, and Anesthesia</td>
<td>MEM 6330</td>
<td>This course studies the clinical side of resuscitation techniques, shock recognition and treatment, and anesthesia used in the emergency department.</td>
</tr>
<tr>
<td>MEM 6211</td>
<td>Emergency Treatment of Orthopedic Injuries, Emergency Ultrasounds, and Radiology</td>
<td>MEM 6330</td>
<td>Study of concepts of orthopedic conditions encountered in the emergency department.</td>
</tr>
<tr>
<td>MEM 6212</td>
<td>Toxicology and Oral Maxillary Facial Disorders</td>
<td>MEM 6330</td>
<td>This rotation studies concepts of toxicological presentations and oral maxillary facial disorders encountered in the emergency department.</td>
</tr>
<tr>
<td>MEM 6213</td>
<td>Cardiovascular, Pulmonary, Hematologic, Oncologic, and Psychosocial Diseases</td>
<td>MEM 6330</td>
<td>The study of concepts of cardiovascular, pulmonary, hematologic, oncologic, and psychosocial diseases encountered in an emergency department environment.</td>
</tr>
<tr>
<td>MEM 6214</td>
<td>Gastrointestinal, Genitourinary, Obstetrics, and Gynecology Diseases</td>
<td>MEM 6330</td>
<td>The study of concepts in gastrointestinal, genitourinary, obstetrics, and gynecology diseases encountered in an emergency department environment.</td>
</tr>
<tr>
<td>MEM 6215</td>
<td>Pediatric Non-Traumatic Musculoskeletal Disorders, Abuse, and Assault</td>
<td>MEM 6330</td>
<td>The study of diseases, non-traumatic muscular skeletal disorders, assault and abuse in the pediatric emergency department patient.</td>
</tr>
<tr>
<td>MEM 6216</td>
<td>Emergency Wound Management, Environmental Injuries, and Trauma</td>
<td>MEM 6330</td>
<td>The study of concepts in wound management, environmental injuries, and trauma encountered in the emergency department.</td>
</tr>
<tr>
<td>MEM 6217</td>
<td>Infectious Disease, Endocrinology, and Neurology</td>
<td>MEM 6330</td>
<td>The study of concept in infectious diseases and endocrinologic, and neurologic disorders that are encountered in an emergency department.</td>
</tr>
<tr>
<td>MEM 6220</td>
<td>Advanced Emergency Medicine, Resuscitation, Shock, and Anesthesia</td>
<td>MEM 6210</td>
<td>This course builds upon MEM 6210 and studies the clinical side of resuscitation techniques, shock recognition and treatment, and anesthesia used in the emergency department.</td>

</table>
MEM 6336 Emergency Department 6 (3)
Pre-requisite(s): MEM 6330
General emergency medicine rotation to apply the concepts of medical practice in an emergency department setting.

MEM 6337 Emergency Department 7 (3)
Pre-requisite(s): MEM 6330
General emergency medicine rotation to apply the concepts of medical practice in an Emergency Department setting.

MEM 6338 Emergency Department 8 (3)
Pre-requisite(s): MEM 6330
General emergency medicine rotation to apply the concepts of medical practice in an emergency department setting.

MEM 6346 Clinical Research (3)
Pre-requisite(s): MEM 6330
The MEM 6346 rotation consists of a didactic phase during the first month of training, dedicated research blocks, and individual research days scheduled throughout the 18-month course. The research course is designed to familiarize the residents with the research process and, more importantly, to facilitate the development of the skills necessary to critically analyze published scientific articles.

MEM 6439 Pediatrics Emergency Department (4)
Pre-requisite(s): MEM 6330
A rotation emphasizing the clinical side of pediatric patients in the emergency department.

MEM 6440 Pediatrics Emergency Department and Pediatric Intensive Care Unit (4)
Pre-requisite(s): MEM 6330
A rotation emphasizing the clinical side of pediatric patients in the Emergency Department and Pediatric ICU.

MEM 6445 Emergency Ultrasound (4)
Emergency ultrasound is the medical use of ultrasound technology for the bedside diagnostic evaluation of emergency medical conditions; resuscitation of the acutely ill, critically ill or injured; and guidance of high risk or difficult procedures. Typically, emergency ultrasound is a goal-directed, focused ultrasound examination that answers brief and important clinical questions in an organ system or involving multiple organ systems.

MEM 6447 Surgical Intensive Care Unit (SICU) (4)
Pre-requisite(s): MEM 6330
A rotation emphasizing the concepts and management of trauma and post-operative patients encountered in the Emergency Department.

MEM 6448 Medical Intensive Care Unit (MICU) (4)
Pre-requisite(s): MEM 6330
A rotation emphasizing life threatening diseases encountered in the emergency department and managed in the MICU.

MEM 6449 Cardiac Care Unit (CCU) (4)
Pre-requisite(s): MEM 6330
A rotation emphasizing the concepts of cardiovascular diseases encountered in the emergency department and managed in the CCU.

MEM 6450 Trauma Surgery (4)
Pre-requisite(s): MEM 6330
A rotation emphasizing the concepts of trauma management and lifesaving surgery.

Military General Surgery (MCG)

MGS 6210 Surgical Basic Principles (2)
Historical surgical perspective on basic cellular, physiological principles of surgery.

MGS 6211 Perioperative Management (2)
Basis of surgery is evaluation of the risk factors of a potential surgical patient. Perioperative management focus on the risk, benefits, and infections of surgery and the complications of anesthesia.

MGS 6212 The Abdomen (2)
The anatomy and physiological process that occur within the abdomen (abdominal wall, umbilicus, peritoneum, mesenteries, omentum, retroperitoneum, hernia, acute abdomen, and acute gastrointestinal hemorrhage).

MGS 6213 Surgery of the Esophagus and Stomach (2)
Anatomy, physiology, disease process, and surgical treatments of the stomach and esophagus, along with hiatal hernia and gastroesophageal reflux disease.

MGS 6214 Surgery of the Small Intestine, Large Intestine, Rectum, and Anus (2)
Surgical anatomy, pathophysiology, disease process, and treatments of the small intestine, large intestine, rectum, and anus.

MGS 6215 Surgery of the Liver and Biliary Tract (2)
Anatomy, pathophysiology, disease process, and treatments of liver and biliary tract.

MGS 6216 Surgery of the Pancreas and Spleen (2)
Anatomy, pathophysiology, disease process, and treatments of the pancreas and spleen.

MGS 6217 Endocrine Surgery (2)
Anatomy, pathophysiology, disease process, and treatment of thyroid, parathyroid, adrenal glands, and endocrine of the pancreas.

MGS 6218 Breast Surgery (2)
Anatomy, pathophysiology, disease process, and treatment of the breast.

MGS 6219 Neurosurgery, Pediatric Surgery (2)
Anatomy, pathophysiology, disease process, and treatments in neurosurgery and pediatric surgery.

MGS 6220 Burn/Critical Care Surgery (2)
Anatomy, pathophysiology, disease process, and treatments associated with burn surgery.

MGS 6221 Trauma Surgery (2)
Anatomy, pathophysiology, disease process, and treatment related to trauma surgery.

MGS 6222 Surgical Critical Care (2)
Anatomy, pathophysiology, disease process, and treatments related to surgical critical care.

MGS 6223 Surgery on the Lung, Chest Wall, and Mediastinum (2)
Anatomy, pathophysiology, disease process, and treatments related to the lung, chest wall, and mediastinum.

MGS 6224 Surgical Oncology (2)
Anatomy, pathophysiology, disease process, and treatment of surgical oncology.

MGS 6225 Vascular Surgery (2)
Anatomy, pathophysiology, disease process, and treatment in vascular surgery.
MGS 6330 Orientation to General Surgery (3)
This rotation emphasizes the clinical skills of providing care and treatment to patients with surgical disease.

MGS 6331 General Surgery Team A (Colorectal, General Surgery, Pediatric) (3)
Rotation is a block emphasizing colorectal and pediatric surgery cases presenting to the General Surgery Department.

MGS 6332 General Surgery Team B (Minimally Invasive Surgery) (3)
This is a clinical block of instruction emphasizing minimally invasive surgery for general surgery and bariatric cases.

MGS 6333 General Surgery Team C (General Surgery) (3)
This rotation is a block emphasizing minimally invasive and bariatric cases presenting to the General Surgery Department.

MGS 6334 General Surgery (WH) (3)
This rotation is a block emphasizing general surgery cases presenting to the General Surgery Department.

MGS 6335 General Surgery Team D (Surgical Oncology) (3)
This rotation is a block emphasizing surgical oncology cases presenting to the General Surgery Department.

MGS 6336 Interventional Radiology (3)
This rotation is a block emphasizing interventional radiology cases presenting to the Interventional Radiology Department.

MGS 6337 Trauma Surgery (Rotation 1) (3)
This rotation is a block emphasizing trauma surgery cases presenting to the Trauma Surgery Department.

MGS 6338 Vascular Surgery (3)
This rotation is a block emphasizing vascular surgery cases presenting to the Vascular Surgery Department.

MGS 6339 Burn Surgery/Burn Critical Care (Rotation 2) (3)
This rotation is a block emphasizing burn surgery/burn critical care cases presenting to the Burn Surgery Department.

MGS 6340 Plastic Surgery (3)
This rotation is a block emphasizing plastic surgery cases presenting to the Plastic Surgery Department.

MGS 6341 Neurosurgery (3)
This rotation is a block emphasizing neurosurgical cases presenting to Neurosurgery Department.

MGS 6342 Trauma Surgery (Rotation 2) (3)
This rotation is a block emphasizing trauma surgery cases presenting to the Trauma Surgery Department.

MGS 6343 Trauma/Surgical Intensive Care Unit (Rotation 1) (3)
This rotation is a block emphasizing trauma/surgery intensive care unit (STICU) cases presenting to the Trauma Surgery Department.

MGS 6344 Trauma/Surgical Intensive Care Unit (STICU) (Rotation 2) (3)
This rotation is a clinical block emphasizing trauma/surgical intensive care unit (STICU) cases that present to the Trauma Surgery Department.

MGS 6345 Burn Surgery/Burn Critical Care (Rotation 1) (3)
This rotation is a clinical block emphasizing burn surgery/burn critical care cases presenting to the Burn Surgery Department.

MGS 6346 Elective Concentration (3)
This rotation is a block emphasizing an elective concentration rotation for the resident.

MGS 6347 Clinical Research (3)
In this course, students develop the knowledge to plan, organize, conduct, and submit for publication an approved Investigative Review Board (IRB) research project.

MGS 6348 Neurosurgery (Rotation 2) (3)

MGS 6349 Orthopaedic Trauma (Rotation 1) (3)
Clinical Rotation evaluating orthopaedic trauma and performing orthopaedic trauma procedures, interventions, and treatments.

MGS 6350 Orthopaedic Trauma (Rotation 2) (3)
Clinical rotation evaluating orthopaedic trauma and performing orthopaedic trauma procedures, interventions, and treatments.
