COMM. SCIENCES AND DISORDERS (CSD)

CSD 4301 Introduction to Clinical Audiology (3)
Pre-requisite(s): Must have completed and earned a "B" or better in each of the following courses: CSD 1308, 2318, 2351, and 3357
Hearing sciences and approaches for evaluating hearing: anatomy and physiology of the ear, the decibel, ear pathology, pure-tone audiometry, speech audiometry, and acoustic-immittance audiometry.

CSD 4302 Language Disorders in Children (3)
Pre-requisite(s): Must have completed and earned a "B" or better in each of the following courses: CSD 1308, 2318, 2351, and 3357
Basic principles of intervention and assessment for children with language impairments.

CSD 4309 Medical Speech Pathology (3)
Pre-requisite(s): Must have completed and earned a "B" or better in each of the following courses: CSD 1308, 2318, 2351, and 3357
Etiologies, characteristics, diagnosis, and treatment of disorders associated with medical speech pathology.

CSD 4312 Advanced Clinical Audiology (3)
Pre-requisite(s): CSD 4301 and must have completed and earned a "B" or better in CSD 1308, 2318, 2351, and 3357
Routine and advanced audiologic measures, including masking and evoked-potential tests. Practical clinical experiences.

CSD 4352 Diagnostic Methods (3)
Pre-requisite(s): Must have completed and earned a "B" or better in each of the following courses: CSD 1308, 2318, 2351, and 3357 or Graduate Online CSD student
A study of diagnostic methods used in speech and language pathology, including interviewing, taking case histories, testing, and counseling. Evaluation of the standardization, reliability, and validity of existing tests. Practical application is required.

CSD 4358 Speech Science (3)
Pre-requisite(s): Must have completed and earned a 'B' or better in each of the following courses: CSD 1308, 2318, 2351, and 3357 or Graduate Online CSD student
Basic sciences underlying speech and hearing: physics of sound, the decibel, instrumentation, speech production, speech perception, and audition.

CSD 4368 Introduction to Aural Rehabilitation (3)
Pre-requisite(s): CSD 4301 or consent of instructor; and must have completed and earned a "B" or better in each of the following courses: CSD 1308, 2318, 2351, and 3357 or CSD Online student
Methods for rehabilitating persons with hearing impairment: evaluating communicative needs, amplification devices, auditory-visual training, and modes of communication for the deaf and hearing impaired.

CSD 4477 Clinical Methods (4)
Pre-requisite(s): CSD 3308; and must have completed and earned a "B" or better in each of the following courses: CSD 1308, 2318, 2351, and 3357 or Graduate Online CSD student
Methods for treating individuals who have communication disorders. Observation of therapy conducted in the Baylor Speech, Hearing, and Language Clinic is required.
CSD 5307  Leveling-Introduction to Phonological Science (3)
Introduction to the phonological rules and processes of American English
and an examination of descriptive, physiological, and acoustic phonetics
in preparation for graduate coursework.

CSD 5308  Leveling-Structures and Functions in Communication and Swallowing (3)
Anatomy and physiology of the subsystems that underlie speech and
swallowing—neural bases, respiration, phonation, resonance, and
articulation as well as speech science in preparation for graduate
coursework.

CSD 5309  Leveling-Introduction to Clinical Audiology (3)
Hearing sciences and approaches for evaluating hearing: anatomy and
physiology of the ear, the decibel, ear pathology, pure-tone audiometry,
speech audiometry, and acoustic-immittance audiometry in preparation
for graduate coursework.

CSD 5311  Aphasiology (3)
Etiology, symptomatology, and treatment of aphasia and kindred
disorders.

CSD 5312  Fluency Disorders (3)
Pre-requisite(s): CSD 4307
Nature, evaluation, treatment, and current research trends in stuttering.

CSD 5313  Augmentative Communication and Severe Populations (3)
Exploration of selection and teaching of augmentative and alternative
communication, and a focus on populations with severe language
disorders including autism.

CSD 5314  Voice Pathology (3)
Pre-requisite(s): CSD 3308 and 4309
Application of principles of voice science to the treatment of organic and
functional voice disorders.

CSD 5315  Motor Speech Disorders (3)
Etiologies, symptoms, classifications, evaluative procedures, and
treatments of developmental and adult motor speech disorders.

CSD 5316  Cleft Lip and Palate (3)
Etiologies, classifications, evaluation procedures, and management of
communication disorders associated with cleft lip and palate and related
orofacial dysmorphologies.

CSD 5317  Methods in Graduate Study in Communication Sciences and Disorders (3)
Methods necessary to evaluate literature, to conduct research, and
describe results in communication sciences and disorders.

CSD 5318  EBP Evaluation and Interprofessional Practice in a Diverse Society (3)
This course focuses on orienting students to the principles of evidence-
based practice (EBP) and evaluations and directs students in utilizing
components of the EBP process in making decisions regarding treatment
and evaluation.

CSD 5320  Neurology and Advanced Instrumentation (3)
Study of the neuroanatomy and neurophysiology of the mechanisms
associated with speech, language, and swallowing, and the
instrumentation and latest technological advances used to study speech,
language, and swallowing.

CSD 5321  Adolescent Language and Learning Disabilities (3)
Pre-requisite(s): CSD 2318
A neuropsychological approach to the etiology, classification, diagnosis,
and treatments of learning disabled children.

CSD 5322  Speech Sound Disorders (3)
Current research, assessment, and treatment of speech-sound disorders
(SSD) including articulation and phonological disorders with functional
and organic etiologies.

CSD 5328  Diagnosis and Treatment of Dysphagia (3)
Development of swallowing, etiologies, evaluative procedures, and
management of swallowing disorders.

CSD 5330  Cognitive Linguistic Communication Disorders (3)
Neuropathology, symptomology, assessment, and treatment of cognitive
linguistic communication disorders associated with right hemisphere
damage, traumatic brain injury, and dementia.

CSD 5331  Traumatic Brain Injury Seminar (3)
Familiarizes students with research literature regarding the
neuropathology, symptomatology, assessment and treatment of persons
having traumatic brain injury.

CSD 5332  Multicultural Issues in Speech-Language Pathology (3)
Relates cultural background to normal development of speech and
language. Topics include sound system acquisition, syntax, pragmatics,
and professional issues and concerns.

CSD 5333  School-Age Language and Literacy Disorders (3)
Contemporary research on language and reading disorders, evidence-
based practice, and language/literacy methods of prevention,
assessment, and treatment.

CSD 5334  Instrumentation and Advanced Speech Science (3)
Pre-requisite(s): CSD 4307 or consent of instructor
Principles and techniques of electronics and new technology used in
the diagnosis and treatment of pathologies of speech and swallowing,
including videostrobolaryngoscopy, digital signal analyses, and flexible
fiberoptic endoscopic evaluation of swallowing.

CSD 5335  Birth to Five Language Disorders (3)
This course is an advanced study of language impairments in children
from birth to five years of age.

CSD 5336  Speech and Language Neurology (3)
Neuroanatomy and neurophysiology as applied to the evaluation of
normal and pathological speech and language behaviors.

CSD 5337  Advanced Medical Speech Pathology (3)
Advanced medical diagnostic procedures and treatment techniques
associated with speech pathology patients in an advanced medical
setting.

CSD 5338  Mentored Research Experience in Communication Sciences and Disorders (3)
Pre-requisite(s): CSD 5318 and/or consent of instructor
Advanced study and application of research methods in communication
sciences and disorders. Supervised by a faculty member in CSD.

CSD 5549  Clinical Internship (5)
Class meetings in conjunction with a supervised, full-time clinical
placement at a therapy site commensurate with the student's graduation
requirements and clinical hour competency needs.

CSD 5649  Speech Pathology Internship (6)
Supervised off-campus experience in speech pathology. Intern placement
will be related to students' specialized area of interest.

CSD 5V07  Seminar in Audiology (1-9)
hrs.
CSD 5V35  Problems in Communication Sciences and Disorders (1-9)
Designed to give students opportunities for additional work in their area of concentration. May be repeated for a maximum of nine semester hours.

CSD 5V39  Advanced Clinical Practicum in Audiology (1-6)
Pre-requisite(s): Nine semester hours in audiology including CSD 4301 and 5304
Supervised practicum in audiology using speech audiometry. Hearing aid selection.

CSD 5V48  Seminar in Speech Pathology (1-9)
Published research, theoretical and clinical, in speech and hearing and allied fields.

CSD 5V99  Thesis (1-6)
Research, data analysis, writing, and/or oral defense of an approved master's thesis. At least three hours of CSD 5V99 are required for thesis.

CSD 6101  Mentored Research in CSD I (1)
Pre-requisite(s): Instructor approval required
Research apprenticeship in area of expertise in CSD. Design, implementation, and dissemination of study outcomes.

CSD 6102  Mentored Research in CSD II (1)
In this course doctoral students work with a research mentor in a collaborative area of research. This course may not be repeated for credit.

CSD 6103  Mentored Teaching in CSD I (1)
In this course doctoral students develop knowledge and skills associated with teaching in higher education. Content includes principles of adult learning, course design, equity and inclusion, teaching philosophy, student engagement, and student assessment.

CSD 6104  Mentored Teaching in CSD II (1)
In this course, doctoral students apply the knowledge and skills associated with teaching in higher education that they developed in Mentored Teaching I. Each student works with a mentor to teach an undergraduate or graduate course. This course cannot be repeated for credit.

CSD 6200  Proseminar in Communication Sciences and Disorders (2)
This course exposes students to current research and topics in the field. The proseminar provides an opportunity for both students and faculty to present reports of research projects that are in the initial stages of formulation, in progress, or completed.

CSD 6205  Professional Writing for Doctoral Students (2)
Development of technical and scientific writing skills. Emphasis on critical review and writing of scientific papers.

CSD 6302  Introduction to Doctoral Studies in CSD (3)
This course includes critical thinking, problem-solving, and synthesis of topics to introduce students to doctoral studies. The history of science in CSD, Ph.D. shortages, IRB, issues in scientific conduct, mentoring models, preparation for study, and servant leadership as well as launching a successful academic career post-graduation are discussed.

CSD 6306  Advanced Neuroscience of Speech, Language, Swallowing, and Hearing (3)
This course is designed to provide a comprehensive introduction to the neuroscience of speech, language, swallowing, and hearing, incorporating current research findings with current perspectives on assessment and treatment of language disorders. It will cover speech, language, swallowing, and hearing mechanisms in the human brain as well as the various types of research methods used in human neuroscience, and their intended uses.

CSD 6308  Doctoral Seminar in Communication Sciences and Disorders (CSD) (3)
Advanced study of special topics associated with speech, language, hearing, and/or swallowing. The course may be taken three times when content differs.

CSD 6314  MATLAB® Programming for Speech, Language, and Hearing Sciences (3)
The course introduces basics of MATLAB® programming and trains students on managing data, plotting data, and graphical user interfaces. The course anticipates and promotes increased reliance on quantification and automation in the field of Speech-Language Pathology and Audiology.

CSD 6316  Single-Subject Design (3)
This course provides a solid foundation in single-subject design (SSD). Specific designs discussed and analyzed include withdrawal, alternating treatments, multiple baseline, and changing criterion designs. By way of contrast, methodologies such as group designs and case studies are also discussed. Students learn to obtain, analyze, interpret, evaluate, and design experimental single-subject studies.

CSD 6V00  Graduate Research (1-10)
Pre-requisite(s): Graduate standing
For research credit prior to admission to candidacy for an advanced degree. Credit will be given for the amount of work done. May be repeated for credit through 45 hours.

CSD 6V10  Doctoral Independent Study in Advanced Communication Sciences and Disorders (1-3)
Focuses on advanced topics in speech, language, hearing, and/or swallowing. Permission of instructor is required. This course may be repeated when content differs for a maximum of 12 semester hours.
