

HEALTH AND SOCIETY CONCENTRATION (SOCIOLOGY, PH.D.)

The health and society concentration focuses on understanding of how social forces and structures are linked to human well-being. As a transdisciplinary area of study, health and society infuses sociological theories and principles with allied work in public health, epidemiology, and gerontology. Social mechanisms are emphasized to illuminate the roles of biology, genetics, and stress in evolving levels of mental and physical well-being across the life course. Students learn to use advanced quantitative methods to address key population health issues.

Code	Title	Hours
Primary Courses		
Select nine semester hours from the following:		9
SOC 5332	The Sociology of Health: Health Delivery Systems	
SOC 6351	Seminar in Population Health
