

COMMUNICATION SCIENCES AND DISORDERS, M.S. (ONLINE)

Department Chair: Michaela Ritter, Ed.D./CCC-SLP

Online Graduate Program Director: Venessa Grandjean, SLP.D./CCC-SLP

Online Clinical Outreach Director: Steven Moates, SLP.D./CCC-SLP

The Communication Sciences and Disorders Department (CSD) also offers an online Master of Science (M.S.) Degree in Communication Sciences and Disorders for graduate students who do not prefer a residential program on the Baylor campus. The Master of Science (M.S.) education program in speech-language pathology (residential and distance education) at Baylor University is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association, 2200 Research Boulevard, #310, Rockville, MD 20850, 800-498-2071 or 301-296-5700.

The online platform incorporates web technologies that can be accessed in most states. Students do not need to be proficient with distance education technology before enrolling, but basic computer literacy, such as knowing how to access a website, is required. Students log into the learning management platform using a secure Baylor login and password. Synchronous sessions are small (approximately 20 students) and conducted via a web video camera. An orientation module for the program is provided and a technology help desk is available to both students and faculty. Asynchronous material is also completed outside of online class time for additional learning.

Admissions

Admission decisions are based on faculty review of cumulative undergrad (or graduate if degree conferred) GPA from degree bearing university, personal statements, resume, and three letters of recommendation. Policies and operating procedures for the online graduate program are detailed in the Online CSD Graduate Handbook and provided to each student electronically at the start of the trimester. Start dates for each student can be individualized to begin in the spring (January), summer (June), or fall (August) trimesters. Each trimester consists of 15-weeks. Graduate coursework is offered in the evenings to allow for clinical experiences in the field during the day. Working at a place of employment during practicum and internship is not recommended; schedule flexibility is required.

Graduate Courses

Online CSD graduate students must complete 45 trimester hours (33 hours of graduate coursework, 3 hours of electives and 9 hours for practicum and internship), accrue 400 clinical hours (including 25 hours of observation), take the National Praxis examination, and pass the required comprehensive examination. This program takes 5 trimesters (approximately 20 months) for full time students and 7 trimesters (approximately 28 months) for part time students. Although this is an online program, over 375 clock hours are spent out in the field completing 3 practicum and 1 internship during weekly workdays. A student who selects this degree should have a flexible daytime schedule during 3 trimesters of practicum and plan no outside employment during the full-time internship.

Required courses for graduate level work consist of:

Code	Title	Hours
Required Courses		
CSD 5150	Introduction to Clinical Practice	1
CSD 5151	Clinical Practicum Placement 1 (needs departmental approval)	1
CSD 5152	Clinical Practicum Placement 2 (needs departmental approval)	1
CSD 5153	Clinical Practicum Placement 3 (needs departmental approval)	1
CSD 5311	Aphasiology	3
CSD 5312	Fluency Disorders	3
CSD 5313	Augmentative Communication and Severe Populations	3
CSD 5314	Voice Pathology	3
CSD 5316	Motor Speech Disorders	3
CSD 5318	Methods in Graduate Study in Communication Sciences and Disorders	3
CSD 5319	EBP Evaluation and Interprofessional Practice in a Diverse Society	3
CSD 5325	Speech Sound Disorders	3
CSD 5328	Diagnosis and Treatment of Dysphagia	3
CSD 5330	Cognitive Linguistic Communication Disorders	3
CSD 5341	Birth to Five Language Disorders	3
CSD 5549	Clinical Internship	5
Total Hours		42

Elective

Students are also required to complete one elective (3 credits) as part of the curriculum. These courses currently consist of:

Code	Title	Hours
Elective		
CSD 4368	Introduction to Aural Rehabilitation ¹	
CSD 5334	Multicultural Issues in Speech-Language Pathology	
CSD 5337	School-Age Language and Literacy Disorders	
CSD 5354	Mentored Research Experience in Communication Sciences and Disorders	

¹ All leveling and graduate students who have not had a course in aural rehabilitation will be requested to enroll in this course as an elective.

Leveling Courses

Students who have been accepted to Baylor's online CSD graduate program but do not have recent undergraduate CSD prerequisite courses are considered a graduate student with leveling status. All students are required to complete 18 hours of undergraduate courses to meet requirements for state licensure and professional certification. Any of these courses that are missing from a student's undergraduate or post-bac transcript will need to be completed prior to beginning graduate coursework. A student may be waived out of a leveling course if it was taken at another university within the past 5 years and a grade of "B" was earned. The course syllabus description must also meet the requirements of the Baylor CSD program as determined by the admissions committee.

This rule also applies to all undergraduate courses taken by CSD majors entering the graduate program.

These required leveling courses consist of:

Code	Title	Hours
Required Leveling Courses		
CSD 5101	Leveling-Observation (25 hours of observation)	1
CSD 5201	Leveling-Clinical Methods	2
CSD 5305	Leveling-Survey of Speech Pathology and Audiology	3
CSD 5306	Leveling-Language Development	3
CSD 5307	Leveling-Introduction to Phonological Science	3
CSD 5308	Leveling-Structures and Functions in Communication and Swallowing	3
CSD 5309	Leveling-Introduction to Clinical Audiology	3
Total Hours		18

ASHA Sciences

The American Speech and Hearing Association requires all students to have completed college level science courses consisting of the biological sciences, physical sciences (either chemistry or physics), statistics, and the social/behavioral sciences (Standard IV-A) from an accredited college or university. A passing grade of D or better is required to count towards a passing credit for these courses. These courses are not offered in the online CSD graduate program and must be taken at another institution.
