FILM AND DIGITAL MEDIA

The Department of Film and Digital Media offers studies in film, video, audio, and new media production, as well as screenwriting, media studies, film theory, media effects, and media management.

The film and digital media major is designed to prepare students for a variety of careers in television, cable, film, digital media, and allied fields. Several courses are designed for non-majors who desire an understanding of the role of the broadcast and film media in American society.

The communication specialist major combines courses in communication and film and digital media. This program of study blends a leadership/management/organizational communication focus with the development of expertise in digital media production. Like the communication major, it is appropriate for students with a wide array of career aspirations but is most appropriate for those intending to take advantage of communication expertise in a corporate career track. The requirements for the communication specialist major are listed in the Department of Communication.

Various activities offer laboratory settings in which a student’s work is aided, directed, and evaluated by faculty specialists in a particular area of the discipline. These activities include:

a. the production of short and feature films by faculty, with students serving in various crew roles to learn how a film set functions, and
b. internship programs in film and digital media, including the annual NAB and the semester in New York City programs, which provide students with real-world experience in their chosen field.

Pre-Film and Digital Media

Students interested in Film and Digital Media as a major will choose the Pre-Film and Digital Media designation upon enrollment at Baylor. Application for entry to the Film and Digital Media major must be made to the Department after a student has completed, with grades of “B” or better, FDM 1198 Practicum in Grip and Lighting Equipment, FDM 1199 Practicum in Video and Audio Equipment, FDM 1304 Visual Literacy: Sight, Sound, Motion, and FDM 2360 Production Methods. The Department will grant admission to all students who fulfill this requirement as it is explained here.

Students may repeat each of these introductory courses only once if they fail to make a “B” or better the first time they take the course. Students may only remain in the Pre-Film and Digital Media major designation until the completion of 60 hours. Students who have not met the admission requirement at 60 hours will not advance to the Film and Digital Media major and must change degree programs. (Transfer students who enter with at least 15 hours will be given up to the completion of 90 hours to complete the four courses with a grade of “B” or better and progress into the Film and Digital Media major.)
