

# ASTROPHYSICS MINOR

## Requirements for a Minor in Astrophysics

| Code  | Title   | Hours     |
|---|---|-----------|
| Twenty-one semester hours including:                |   |           |
| <b>Required Courses</b>                             |   |           |
| PHY 1420  | General Physics I                               | 4         |
| PHY 1430  | General Physics II                              | 4         |
| PHY 2455  | Foundations of Astronomy                        | 4         |
| Select six semester hours from the following:       |   | 6         |
| PHY 3350  | Topics in Astronomy                             |           |
| PHY 4350  | Introduction to Stellar Structure and Evolution |           |
| PHY 4351  | Introduction to Modern Cosmology                |           |
| Three semester hours of 3000-4000 level PHY courses |   | 3         |
| <b>Total Hours</b>                                  |   | <b>21</b> |
