The faculty believes that health is a basic human condition which is uniquely perceived by individuals and groups. Health is a dynamic state of human functioning wherein clients exist with varying degrees of wellness and illness. The higher the level of human need fulfillment, the more optimal the state of wellness for the client. Individuals have the right to pursue that level of health perceived by them to be optimal, taking into account their social and cultural definitions of health. The level of health that individuals can attain is influenced by the levels of health of families and communities of which they are a part and with whom they coexist.

The faculty believes that professional nursing is the caring for individuals, families, groups, communities, and society through the diagnosis and treatment of the responses to actual or potential threats to health and through facilitating human need fulfillment. Professional nursing is a practice discipline which has evolved from a rich, unique heritage. It encompasses the arts, sciences, ethics, and politics. Nursing has a dynamic body of knowledge based on nursing research and on the application of theories and concepts from the physical and behavioral sciences and the humanities. Professional nursing utilizes the nursing process in a caring, interactive manner to promote optimal wellness. Through a variety of roles, professional nursing contributes to the improvement of health care services to society.

**Program Outcomes**

The curriculum is designed to provide learning experiences that will prepare the graduates to:

2. Practice as a professional nurse to facilitate human need fulfillment of individuals, families, groups, communities, and populations across the lifespan in a variety of healthcare settings.
3. Utilize the human needs framework and current evidence as a basis for professional nursing practice.
4. Utilize information management systems to deliver, evaluate, and improve the safety and effectiveness of patient care.
5. Demonstrate effective communication, collaboration, and care coordination as a member of the inter-professional health care team to improve health outcomes.
6. Demonstrate professional, ethical, moral, legal, and spiritual concepts into one's practice within a global environment.
7. Synthesize leadership and management strategies in the delivery of health promotion and disease prevention at the individual and population level.
8. Demonstrate understanding of healthcare policy, finance, and regulatory standards on quality outcomes and nursing practice.
